

Trash Can

Category: Home & Kitchen

Note

I use Helium10 Magnet to get keywords against my keyword TRASH CAN and then I use a filter to show me only that keywords that have minimum search volume 1000 and then I extracted keywords that are related to my keyword TRASH CAN & this same procedure goes for Jungle Scout.

Then I take top 3 competitors that are rank on 1, 2 & 3 positions I copy their Asins and use Helium10 tool Cerebro to take Reverse Asin and then I use filter to show me only that keyword who have minimum search volume of 1000 and that keywords in which they are organically rank on first and second position and filter out the keywords that are related to my keyword.

I make an excel file and combine that keyword and use Scribble then add the list of keywords in it and I start making the List (according to the rules).

Title

RMS Stainless Steel Trash Can with Lid One Step, Detachable Inner Bucket - Kitchen Essentials for New Home and Suitable for Bedroom and Office 6-Liter Slim (Black)

Bullet Points

Run the Jungle Scout extension and sorted the monthly revenue from high to low and choose the competitor who have more revenue and then I use Cerebro tool to take Reverse Asin and then filter keyword list who have a search volume minimum 1000 and they are organically rank on 1 to 10 position and then I use that keyword on my Backend Search Terms.
